

DermAllegra

International

Vitiligo Center

Professor Ulrich Amon, MD
Dr. Raul Yaguboglu

*Dear Madam,
Dear Sir,*

*We would like to welcome you at our
International Vitiligo Center in the
DermAllegra Clinic for Dermatology,
located in the Europaen Metropolitan-
Region Nuremberg!*

*The main goal of our vitiligo concept
is to find the underlying causes of
your pigmentation disorder for
subsequent development of an
individual treatment plan.*

*We deeply hope that you feel well in
our center. We thank you for your
confidence.*

Professor Ulrich Amon, MD
Dermatologist

Dr. Raul Yaguboglu
Dermatologist

Patients suffering from vitiligo visit our center from different areas of the world. We have developed a proven treatment concept for vitiligo. In most cases there is a very good chance for significant improvement of this skin disease.

before ...

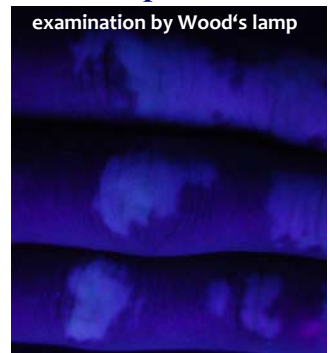

... and after treatment

Different types and variations of vitiligo require individual treatment concepts!

Central aspects of our vitiligo concept are ...

- ... specific lab investigations for the cause of pigment loss
- ... Measurement of pigment content using a specific skin test center
- ... minimal erythematous dose for UV-B light
- ... skin examination by using Wood's lamp
- ... black light measurement
- ... digital video documentation
- ... narrow band UV-B treatment
- ... Excimer 308 nm laser and Excimer 308 nm phototherapy
- ...antioxydative capsules
- ... specific topical double-layer treatment
- ... ointment-occlusion
- ... **pigment cell transplantation**

examination by Wood's lamp

before ...

... and after Excimer treatment

*Quality of life in vitiligo is often reduced significantly, and patients suffer strongly from their disease. In close cooperation with our patients we work out a **treatment plan** depending on duration, cause and intensity of disease. Therapeutic strategy is based on new scientific knowledge.*

SOD-VitiGel with anti-oxidative capacity containing superoxide dismutase and catalase for topical application is combined with anti-oxidative VitiCaps as food supplement.

Fur further information for ingredients and supply see: www.vitiligo-expert.com.

Stimulation of pigment cells following combined treatment of topical double-layer treatment plus narrow band UV-B phototherapy.

Excimer 308 nm laser or Excimer 308 nm phototherapy induce a strong stimulation of pigment cells. Treatment intensity depends on the type of your disease. A combination with narrow band UV-B phototherapy exerts synergetic effects.

before ...

... after 10 x Excimer laser sessions

Pigment cell transplantation (PTx) is our most innovative treatment option for patients with stable disease. PTx is based on a method used in burn surgery and was further developed for patients with vitiligo by Professor Amon.

Ptx

PTx is performed in local anesthesia. Pigment cells are isolated from healthy skin to be transplanted (sprayed) on vitiligo spots having been treated by Er:YAG laser before.

Pigment-activity of transplanted pigment cells normally starts within 3 to 6 months following UV-B and Excimer stimulation.

before ...

... 6 months after PTx

Example for pigment cell transplantation

Coming by car:

On **Autobahn A9** exit „**Lauf Nord**“ (**Lauf/Hersbruck**) → turn right → direction „Hersbruck“ on **B14**. At the 1st roundabout take the 1st exit! Passing Hersbruck on **B14** take exit „**Neuhaus/Hohenstadt**“. In the roundabout take exit „**PEZ/DermAllegra Klinik**“. Then 1st street left until the end of the street → light yellow building on the right hand side: **medic-center. DermAllegra Clinic** 1st floor. Important: the new street „**Am Markgrafentpark**“ has not yet been included in all navigation systems. For your orientation: our center is located roughly 40 km northeast of Nuremberg.

Further important informations:

- If you fly to Nuremberg airport (www.airport-nuernberg.de), we will pick you up if you inform us in time.
- Since many patients travel long distances to our center we strongly recommend to book a hotel: www.hersbrucker-schweiz.com (very close) or www.booking.com/hotels-nuernberg (nice town to visit).
- If we may offer you help finding a accomodation for you, please don't hesitate to contact us (see above).
